Introduction

Veteran Technology Partners, LLC is a leading technology solutions provider, committed to serving our military heroes and veterans across the globe. We are dedicated to supporting the mission-critical goals of our Federal Government by providing first-class technology solutions.

The purpose of this document is to report on the sustainability and ESG practices of Veteran Technology Partners, LLC for the fiscal year 2025. The report covers the emissions data for the reporting period January 1, 2025, to December 31, 2025.

Our Impact

Veteran Technology Partners, LLC is honored to serve the 18 million veterans across the United States. We are dedicated to supporting the Federal Government in achieving its goals. As an active Service-Disabled Veteran-Owned Small Business (SDVOSB), we benefit from the 15% of the VA's funds allocated to SDVOSBs. Our mission is to directly enhance and empower the organizations that veterans rely on by providing them with high quality performance technology solutions. In doing so, we aim to indirectly improve accessibility and convenience for veterans themselves.

Our Services

Cloud Computing: Private and Hybrid Cloud, Programmability, Hosted Applications, MultiCloud Solutions

Networking: Software-Defined Networking (SDN), Software-Defined Wide Area Network (SD-WAN), Data Center Networking, LAN/WAN Infrastructure, Enterprise Wi-Fi and WiMAX Systems

End User Computing: Desktop, Thin Client, Virtual Desktop Infrastructure (VDI) Solutions, Commercial and Ruggedized Notebooks, Telephony, VoIP Systems, Phones, Headsets, Printing and Imaging Solutions, LED/LCD Displays

Data Center: Storage, Enterprise Servers, Server Rack Systems, Remote Monitoring and Management, Power and Cooling

Security: Security Software, Risk Assessments, Data Protection, Network Security, Endpoint Defense

Patient Care: HIPAA Compliance, Electronic Medical Records (EMR) and Electronic Health Records (EHR) Mandates, Patient Mobility, Wireless Solutions

Collaboration: Audio and Video Conferencing, Collaboration Applications, Audio-Visual Solutions, Orchestration and Automation

A Message From Our CEO

Dear Valued Stakeholders,

As the CEO of Veteran Technology Partners, LLC, I am honored to highlight our unwavering commitment to social responsibility and sustainability, which are central to our mission of supporting our nation's heroes through innovative technology.

Since our founding in 2016, Veteran Technology Partners, LLC has been devoted to modernizing IT infrastructure and addressing technology challenges for the Department of Veterans Affairs and other supporting agencies. Our approach is deeply rooted in respect for our veterans and a strong desire to give back to those who have sacrificed so much for our country.

Our social impact goes beyond delivering cutting-edge solutions; it is about making a positive difference in the lives of veterans and their families. We aim to ensure that our efforts not only meet current needs but also contribute to a sustainable future.

We are committed to minimizing our footprint through responsible business practices and sustainable technology solutions throughout our supply chain. In our pursuit of excellence, we prioritize the well-being of our employees, many of whom are veterans themselves. We foster a workplace where opportunities for growth are plentiful. The unique insights and experiences of our team are the driving force behind our success and innovation.

Moreover, we recognize the importance of community engagement. We actively participate in initiatives that support veteran welfare, education, and employment. We believe in building strong relationships with our clients, partners, and the communities we serve, ensuring that our impact is widespread and meaningful. Looking ahead, Veteran Technology Partners, LLC will continue to lead by example in social responsibility and sustainability. We are dedicated to maintaining the highest standards of integrity and excellence, honoring our commitment to our nation's veterans.

Sincerely,

Mike Gasparino

Organizational Chart

Sustainability Management Policies

As a completely remote reseller organization without a physical manufacturing location, our company maintains a very low carbon footprint compared to organizations with manufacturing sites. We are proud to announce the production of our Corporate Sustainability Responsibility Report in 2026, which will detail our corporate practices from fiscal year 2025. By partnering with vendors and reselling products from companies actively offsetting their carbon emissions, we demonstrate our commitment to supporting and investing in products backed by carbon emissions monitoring.

Veteran Technology Partners, LLC is dedicated to mitigating environmental impacts by partnering with vendors who implement their own environmental policies, environmental management systems, and contribute to offsetting carbon emissions. Internally, we focus on maintaining and improving our Environmental Management System (EMS) through our ISO 14001:2015 certification. These commitments highlight our dedication to reducing environmental impacts throughout the reseller business and supply chain.

Veteran Technology Partners, LLC operates an internal environmental management system that is certified to ISO 14001:2015. This certification underscores our commitment to maintaining a rigorous and robust environmental management system. We conduct annual internal and external audits to ensure that our Environmental Management System (EMS) is continually improving and being updated as necessary to adapt to changes within our business. These audits help us identify areas for enhancement and ensure compliance with the highest standards of environmental management.

Continued

In addition to our EMS, Veteran Technology Partners, LLC has implemented a formal Environmental Policy. This policy is meticulously reviewed and updated on an annual basis to ensure its accuracy and precision. The Environmental Policy is a critical component of our commitment to environmental stewardship and is included in our annual audits, both internal and external. These audits are conducted to comply with the stringent requirements of our ISO 14001:2015 certification, ensuring that our environmental practices are consistently aligned with international standards.

In addition, Veteran Technology Partners LLC participates in quality management ISO 9001:2015 to meet applicable statutory and regulatory requirements. These aim to improve quality, efficiency, and customer satisfaction while managing risks and driving continuous improvement. Veteran Technology Partners LLC also adheres to ISO 27001:2022 and ISO 28000:2022 because security is essential to our business and our clients. These are paired with ISO 20243:2018 which certifies our Open Trusted Technology Partner Standard (OTTPS) status.

As a remote reseller operation without a physical location, we are unable to directly utilize renewable energy sources. However, Veteran Technology Partners, LLC prioritizes collaborating with vendors, such as Ace Computers, who leverage Renewable Energy Credits (RECs) and renewable energy sources to offset their electricity consumption. By partnering with vendors committed to investing in renewable energy, we believe that Veteran Technology Partners, LLC can contribute to promoting the continued adoption of renewable energy within the reselling supply chain.

Veteran Technology Partners, LLC has no explicit recycling program of their own as a reseller, instead, they partner with Ace Computers and their Product Take-Back, End of-Life Processing, and E-Waste Program to ensure both our company and our customers have access to a reliable and environmentally friendly IT-disposal and deposition take-back program. We ensure to partner with recycling take back programs who are certified to Qualified Electronics Recycling Standards such as: The Responsible Recycling (R2) Standard for Electronics Recyclers; ii) The eStewards Standard for Responsible Recycling and Reuse of Electronic Equipment; iii) EN 50625 [B6] iv) WEEELABEX V.10. For example, Veteran Technology Partners, LLC's business partnership with Ace Computers gives them access to their recycling companies, including Com2Recycling, an R2 Certified recycler.

Veteran Technology Partners, LLC prioritizes purchasing EPEAT-compliant products from various suppliers. By doing so, we ensure that sustainable practices are upheld for agencies needing to procure solutions and services that meet their budget and contract requirements while still supporting sustainable purchasing. Additionally, we strive to partner with businesses that are RBA-compliant and adhere to supplier codes of conduct whenever possible.

Continued

Veteran Technology Partners, LLC is committed to sustainability. As a technology solutions provider, we understand the importance of sustainable practices in our industry, particularly in areas such as electronics waste and recycling. We are dedicated to exploring and implementing sustainable practices in all areas of our operations including a focus on energy and emissions. We often partner with Ace Computers in their EPEAT Take-Back / EOL / E-Waste Program.

Disclosure on Management Approach

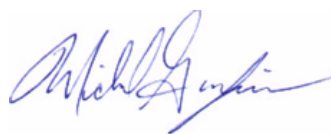

POLICY OF VETERAN TECHNOLOGY PARTNERS, LLC

"We are committed to fostering a diverse and inclusive workplace that promotes employee well-being. Our approach includes implementing employee training programs, offering flexible work arrangements, and establishing employee resource initiatives. We regularly monitor diversity metrics and employee feedback to ensure continuous improvement.

Protecting customer data is paramount. We adhere to strict data protection policies and provide ongoing staff training on data privacy. Our incident response plan ensures prompt action and transparent communication in the event of a data breach. Our environmental strategy focuses on reducing our carbon footprint through energy-efficient practices, adopting product recycling initiatives and engaging employees in sustainability initiatives. We actively engage with local veteran communities to understand their needs and contribute positively. Our community programs include volunteer initiatives and local economic support. We are mindful of the impact of our activities and seek community feedback to guide our efforts.

Innovation is at the core of our business strategy. We track the energy performance of our products and services and aim to continuously improve their energy efficiency."

Mike Gasparino

FIGURE 1: Regional data was pulled from the following state breakdown.

c. Veteran Technology Partners LLC describes the methodologies and assumptions used to compile the data, including whether the numbers are reported as follows:

- i. Veteran Technology Partners LLC is reporting based on full-time equivalent (FTE)
- ii. The data for this report was gathered at the end of the period for which we are reporting on, which is the January 1, 2025, to December 31, 2025, reporting year.

d. Veteran Technology Partners LLC reviewed HR data for the period of January 1, 2025, to December 31, 2025. From this data, they developed a regionalized method to pull data from states by regions as noted in Figure 1 below. Once regional parameters were set, gender was examined by region. Where necessary, PTE data was noted so it could be reported separately and transparently.

e. There were no major changes or fluctuations in employees during this reporting year compared to the previous year.

Disclosure 2-8 Workers who are not employees

a. Of employees whose work is controlled by the organization, Veteran Technology Partners LLC has no employees to report in the categories of workers who are not employees. b. Veteran Technology Partners LLC reviewed HR data for the period of January 1, 2025, to December 31, 2025. Upon review, it was confirmed that there were no workers within this category. Veteran Technology Partners LLC's human resources department pulled data from corporate records per request of the sustainability department. Data was compiled from a digital source, there were no assumptions beyond the specific FTE, Gender and Region requirements and data was pulled following the GRI Manual guidance documentation.

- i. Veteran Technology Partners LLC reviewed HR records by full-time equivalent (FTE).
- ii. The review of Veteran Technology Partners LLC's records examined the end of the reporting period.
- c. There are no employees in this category and no change from the baseline year.

GRI 2 Disclosures

Disclosure 2-9 Governance structure and composition

a. Veteran Technology Partners LLC describes its governance structure, including committees of the highest governance body as; The organizational structure of those functions, which may impact on the Integrated Management System (IMS) and Environmental Management System (EMS), is described in the Figure 2 organizational chart. Each major function of the organization is positioned to allow the effective implementation of the Environmental Management System. The Management Representative has the necessary authority to resolve environmental issues and the organizational freedom of reporting directly to the CEO, to alleviate conflicts with other considerations.

b. List the committees of the highest governance body that are responsible for decision making on and overseeing the management of the organization's impacts on the economy, environment, and people. The management team has oversight over the decision making regarding the Organization's impact on the economy, environment, and people. They operate in a pyramid hierarchy, where the apex can make final decisions.

c. Describe the composition of the highest governance body and its committees by:

i. The executive and non-executive members breakdown of Veteran Technology Partners LLC includes two executives who actively make governance decisions for Veteran Technology Partners LLC Environmental Sustainability reporting.

ii. Veteran Technology Partners LLC is a small, private company with only a small management team and the level of independence is low.

iii. The tenure of members on the governance body are as follows: Mike Gasparino (CEO/owner) 2016 and Marianne Samborski (CFO) 2016.

iv. Number of other significant positions and commitments held by each member, and the nature of the commitments include Marianne Samborski also holds the position of President at an information technology solutions company serving the Federal Government sector.

v. The gender break down is one male and one female.

vi. Potentially under-represented social groups within governance body include POC, LGBTQIA+, Disabled Persons, Immigrants, Non-English Speakers, Homeless, Refugees, Religious Minorities, Single Parents, Low Income Earners, First Nations/Indigenous Peoples, Migrant Workers, Ethnic Minorities. However, the company itself is much more diverse.

vii. Competencies relevant to the impacts of the organization include engineering, business administration and technology.

viii. Stakeholder representation includes: owners, managers, employees, suppliers, voluntary programs which include Energy Star and EPEAT, society, government, customers.

Disclosure 2-14 Role of the highest governance body in sustainability reporting

a. Veteran Technology Partners LLC reports the highest governance body responsible for reviewing and approving the reported information, including the organization's material topics is the Management Team, who reviews yearly audits and reporting by reading the audit summary and gathered data to ask for additional information, provide inputs and changes, and approving the information.

b. If the highest governance body is not responsible for reviewing and approving the reported information, including the organization's material topics, explain the reason for this. Veteran Technology Partners LLC reports this section as "Not Applicable," because the highest governance body does review and approve this information.

Data Security and Privacy

- Importance to Stakeholders: High
- Impact on Business: High
- GRI Standards References: GRI 418: Customer Privacy
- Disclosure: At Veteran Technology Partners, LLC, we recognize the critical importance of data security and privacy. We adhere to stringent standards to protect customer data, as outlined in GRI 418.

Key Performance Indicators

While specific KPIs for Veteran Technology Partners, LLC are not publicly available, our performance is reflected in our commitment to serving our military heroes and veterans. Our success is also evident in our ability to provide a wide range of value-added capabilities to support the mission-critical goals of our Federal Government.

Materials Sustainability Benchmark

- KPI: Recycled Materials
- Calculation/Description: Percentage of materials recycled out of the total materials used, as reported through our partnership with Ace Computers.
- Category: Environmental, GRI 301
- FY2025 Reporting: 82.64%

Environmental Compliance Benchmark

- KPI: Compliance Costs & Sanctions Total
- Calculation/Description: Financial implications of fines and the amount of non-monetary sanctions for not adhering to environmental laws.
- Category: Environmental, GRI 307
- FY2025 Reporting: \$0.00 USD fines and 0 sanctions

Employee Well-being and Diversity Benchmark

- KPI: Number of health and safety incidents
- Calculation/Description: Total number of incidents or accidents that resulted in injury or health issues over a specified period.
- Category: Social, GRI 405
- FY2025 Reporting: 0 incidents

Data Security and Privacy Benchmark

- KPI: Number of data breaches
- Calculation/Description: Total number of incidents where unauthorized access to company data occurred.
- Category: Governance, GRI 418
- FY2025 Reporting: 0 breaches

Energy Efficiency Benchmark

- KPI: Internal Energy Consumption Total
- Calculation/Description: Total estimated energy use for office space leased from Ace Computers
- Category: Environmental, GRI 302
- FY2025 Reporting: 0.94 giga joules

Waste Management Benchmark

- KPI: Waste Generation & Disposal Total
- Calculation/Description: Total mass of waste produced, categorized by type and disposal method.
- Category: Environmental, GRI 306
- FY2025 Reporting: Total All Waste: 0 tons

GHG Emissions Total Benchmark

- KPI: Scope 1,2,3 GHG Emissions Total
- Calculation/Description: Combined direct (Scope 1) and indirect (Scope 2 and 3) greenhouse gas emissions in CO2 equivalent.
- Category: Environmental, GRI 305
- FY2025 Reporting: 1 CO2e metric tons

Our Commitment

Veteran Technology Partners, LLC is dedicated to delivering top-tier technology solutions that support the mission-critical objectives of our Federal Government. Our extensive portfolio of contracts, including SEWP V and Cisco DOD ESI, showcases our proven track record and unwavering commitment to excellence. These partnerships highlight our ability to provide reliable and innovative technology solutions that meet the stringent requirements of federal agencies.

Furthermore, Veteran Technology Partners, LLC's corporate sustainability is deeply intertwined with our dedication to serving our military heroes and veterans. We are passionate about providing the best technology solutions to address their unique needs and enhance their operational capabilities.

Our efforts contribute significantly to the success of our Federal Government, ensuring that our nation's defenders have access to cutting-edge technology that supports their vital missions. In conclusion, our commitment to social responsibility and sustainability is reflected in our ongoing support for veterans and federal agencies. Veteran Technology Partners, LLC remains steadfast in its mission to deliver exceptional technology solutions that drive progress and foster a brighter future for our military heroes and the communities they serve.
